

## **EMSP COMMUNICATION PRODUCTS**

One of the goals of the EMSP is to focus the nation's science infrastructure on critical Department of Energy environmental problems. One of the "tried and true" ways to increase the general body of knowledge within the scientific community is through publication of research methods, results, and issues. EMSP research has provided a basis for numerous information exchanges through this method. EMSP researchers and staff have developed 950 journal articles, papers, presentations, and other communication products. 133 articles have been submitted for review, and many additional news articles and press releases are either in development or planned as research within the program matures. The numbers of known publications and presentations as of December 31, 1999 are as follows:

- 329 Journal Articles
- 39 Other (Encyclopedias, manuscripts)
- 55 Papers
- 4 Patent disclosures and applications
- 17 Posters
- 368 Presentations
- 5 Press Releases
- 98 Proceeding Contributions
- 35 Reports

**NOTE:** In instances where an author was not identified for a particular communication product, the PI of the respective program has been listed as the author.
